(54) **Surgical instruments employing sensors**

(57) According to an aspect of the present disclosure, a surgical instrument (10,100,200,300) for operating on tissue is provided. The surgical instrument includes an end effector including a first tissue engaging member (20) and a second tissue engaging member (22) juxtaposed relation to the first tissue engaging member; a gap determination element (60,62) operatively associated with each of the first tissue engaging member and the second

tissue engaging member for measuring a gap distance between the first tissue engaging member and the second tissue engaging member; and a tissue contact determining element (60,62) operatively associated with a respective tissue contacting surface of at least one of the first tissue engaging member and the second tissue engaging member. The present disclosure also relates to methods of using the surgical instrument.

Tissue Contact Circuit

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 01 1501

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
